Report Composer

Report Composer for Gen applications

Offering visual report design and generation along with sequential file handling capabilities

Increased Responsiveness to User Demands

Production report development and maintenance is much easier for Gen systems with the state-of-the art Report Composer visual report writer. Develop sophisticated reports and generate the full reporting code within minutes of starting your development so you can respond quickly to user requests throughout the entire system life cycle.

Focus on Business Solutions not on algorithms

Report Composer's impressive visual designer allows developers to focus on providing solutions to their end users rather than on algorithmic complexities. Many sophisticated structural visual design elements are available for the report developer without the need for any programming. Let the powerful code generator automatically create your well structured, easy to read reporting program code.

Flexible Architecture: Batch, Online, Client-Server, Web

No matter what architecture is chosen for your Gen application, Report Composer will deliver the right reporting solution for you. The generated code is designed to accommodate a wide variety of application architectures and topologies and provides feature rich reporting solutions for all of the Gen target platforms.

Key Benefits

- ✓ Designed and Developed for Gen
- ✓ Fast Visual Report Design
- ✓ Automatic Program Generation
- ✓ 100% pure COBOL, C, Java or C#
- ✓ Data Retrieval with Gen Action Diagrams
- ✓ Sequential File Handler support
- ✓ Single skill set
- ✓ Generate PDF report on z/OS
- ✓ Version Control

High productivity

- Significant development and maintenance productivity improvement by extending the capabilities of CA Gen to include web reports
- Shelters developers from COBOL, C, Java or C# and its low level programming environment thus reducing manual errors and the associated recycles
- Quickly take your existing Report Composer reports to the Web

Single skill set

- Allow developers to focus on providing a solution for the business requirements rather than on low level algorithmic, technical programming
- Reduces training requirements
- Only reporting vendor with dedicated CA Gen knowledgeable Help desk staff

Bulk Code Generation option for easy Gen Upgrades

The Bulk Generation option provides the capability to convert all Report Composer EABs within a Report Composer repository to Gen r8.x format in a single pass, thereby avoiding the need for version control of each EAB. You can also select more than one report for generation in "bulk" thus saving even more time for developers.

Fast Development & Even Faster Maintenance

80% of a typical application life-cycle cost is spent on maintenance. You can reduce your reporting and file handling maintenance cost using Report Composer. Your maintenance and support programmers will be able to perform consistently and deliver much faster when utilizing visual analysis and design with automated code generation.

Integrated solution

- Enriches CA Gen application with integrated reports: block mode, GUI, web or Crystal Reports
- Integrates reports with CA Gen models and makes reporting programs visible in encyclopedias as EAB's allowing fast impact analysis and version control

Lower development and maintenance cost

- Supports automated and repeatable development processes resulting in significantly reduced development and maintenance costs
- Higher quality deliverable reduces cost of recycling
- Protects investment made in Report Composer non-web reports

Our Commitment to Gen Users

Response Systems is committed to the continued delivery of innovative and cost effective solutions for the Gen user community. We are the only reporting vendor that has consistently provided solutions for the diverse and growing technology target platforms supported by Gen. Our reporting solution has grown with the capabilities of Gen, from text based to GUI, from batch through client-server and even to the web. We continue to work towards providing effective solutions to the Gen community keeping in mind the need to protect your investment against future technology changes.

About Response Systems
We empower Gen customers across the globe with software to maximize their returns from Gen.

Established in 1995, Response Systems is based in the UK and Australia with over 150 customers throughout the world. We are a Broadcom Reseller and long standing Broadcom Development Partner.

Response Systems is part of the Facet Group (www.facet.com.au), who specialize in the provision of expert Gen Consulting and Project services. Facet is a global Gen services delivery partner for Broadcom.
